By adding a trusted contact, you authorize Vanguard to communicate with that person if necessary and in the interest of protecting your account assets. We'd communicate with your trusted contact if we become concerned you are, or may become, a victim of fraud or exploitation, or if we become concerned you could be experiencing a mental or physical impairment—such as Alzheimer's disease or dementia—that has rendered you unable to protect your own interests. Therefore, we may need to disclose certain account information to your trusted contact, but we'd only do so when relevant to verify this information. Although you decide who to name as your trusted contact, we suggest someone who isn't authorized to transact on your account. A trusted contact should be a person you'd trust to provide an informed and objective assessment about your whereabouts, well-being, and health status.

Note: Trusted contacts aren't applicable to 403(b) accounts, 529 accounts, annuities, and institutional accounts.
